

# 9

## Theory of polymer–membrane interactions

Fabrice Thalmann and Carlos M. Marques

“And in this way, we will be as precise as required”

**Pedro Nunes,**  
*in De Crepusculis, 1542 (Lisbon) describing the nonius, his invention*

9.1	Bilayers and Polymers Are Intimate Old Friends	230
9.2	How Do Polymers Interact with Membranes?	230
9.2.1	Polymers and Membranes: The Polymer Viewpoint	230
9.2.2	Membranes and Polymers: The Membrane Point of View	233
9.3	Depletion of Rigid Particles: Rods and Spheres	235
9.3.1	Depletion of Hard Spheres	235
9.3.2	Depletion of Hard Rods	236
9.3.3	Giant Unilamellar Vesicles and Depleted Colloids	237
9.4	Membranes in Solutions of Nonionic Polymers	237
9.4.1	Membranes Exposed to Depleted and Adsorbed Ideal Polymers	237
9.4.2	Membranes Exposed to Solutions of Polymers with Excluded Volume	239
9.4.3	GUVs Exposed to Depleted and Adsorbed Polymers	242
9.5	End-Grafted Polymers	242
9.5.1	Decoration by Diluted End-Grafted Polymers: Global Effects of a Mushroom Layer	243
9.5.2	Influence of Chain Architecture	243
9.5.3	Loops and Siamese Molecules: Effect of Anisotropy	244
9.5.4	Influence of Excluded Volume	245
9.5.5	Local Effects from Single End-Grafted Polymers	245
9.5.6	Membranes with Polymer Brushes	246
9.5.7	Giant Unilamellar Vesicles Decorated by End-Grafted Polymers	247
9.6	Charged Polymers and Charged Membranes	249
9.6.1	Adsorption of Charged Polymers on Oppositely Charged Membranes	249
9.6.2	Influence of Charged Brushes on Membrane Properties	250
9.7	Insertion of a Polymer in the Bilayer	250
9.8	The Bilayer as a Polymer Confinement Medium	252
